Press Release - Benchtop Fume Extraction with HEPA Filter

Press Release - August 12th, 2016

For Immediate Release

Thermaltronics, a fast growing manufacturer of soldering systems and accessories, has announced the introduction of a new versatile, benchtop fume extraction system.

The unit, which is certified to TUV NRTL and TUVE CE safety standards, is available in both 110V and 220V versions and unlike most other benchtop units, has an adjustable speed control to allow operators to select the best operating speed, dependant on fume conditions.

In addition to the pre-filter, which is standard, 2 other filtration options are available, providing either 90% regular filtration or 99% hepa filtration.

Priced at under USD 200.00 and with a 1 year warranty, the TMT-FE100S, offers an affordable and versatile approach to the effective removal of soldering fumes generated on the workbench.

Interested customers are invited to learn more about the new benchtop fume extraction unit by visiting our website at: <http://www.thermaltronics.com>
