## Soldering Station

### **TMT-10005**

ESD FREE

LEAD FREE

The TMT-1000S is based on Curie Heat Technology which responds to the thermal demands of each solder joint by automatically adjusting the power output instantaneously, providing instant power regulation to prevent overheating or underheating of components during soldering.

- ► Rapid RF heating with no temperature overshoot
- ► Precise temperature control ±1.1°C (±2°F)
- ▶ No calibration or operator training required
- ► No additional coil assembly costs
- ► Tip automatically powers down when handpiece is placed in sleep workstand

#### **SYSTEM CONFIGURATIONS**

Model Number	Handpiece	Tip Cartridge	Connector
